

WE'RE A DIFFERENT  
KIND OF  
PHARMACEUTICAL  
COMPANY. AND  
THAT MAKES ALL  
THE DIFFERENCE.

Greenwich Biosciences is dedicated to making life better for people living with serious medical conditions, including childhood-onset seizure disorders. Patient needs inspire everything we do. Our unwavering mission is to unlock the potential of cannabinoid medicines like EPIDIOLEX for people with limited treatment options.

*“Our primary purpose is to make a positive and meaningful difference in the lives of patients and their caregivers”*

- Justin Gover,  
Chief Executive Officer

COMPASSION WITH A  
SENSE OF URGENCY

We understand that patients without good options need help as quickly as possible. That's why we've committed our resources to accelerating product development while still maintaining the highest standards of quality.

EPIDIOLEX IS THE FIRST  
AND ONLY FDA-APPROVED  
PRESCRIPTION  
CANNABIDIOL (CBD)

EPIDIOLEX is the first and only FDA-approved prescription cannabidiol for Dravet and LGS, and the first FDA-approved treatment for Dravet. For us, EPIDIOLEX is just the first step toward transforming the treatment of epilepsy in your loved one's lifetime.

**Please see back panel for Important Safety Information.**

WE BELIEVE THE BEST  
IS YET TO COME

We are always seeking solutions that will transform lives. That's why we continue to advance cannabinoid science and study new medications to help meet serious unmet patient and caregiver needs. We look forward to partnering with you on your journey.

EPIDIOLEX.COM.**

## AHEAD OF THE CURVE AND AHEAD OF OUR TIME

Based in the UK, our parent company was created in 1998 with the express purpose of studying the potential of cannabis as a source of mainstream medicine. This was not a popular idea 20 years ago, but we persisted and successfully developed the world's first plant-based, prescription cannabinoid medications.

## PATIENT NEED DROVE US FROM THE START

In 2012, the parents of an 11-year-old boy from San Francisco, CA — who was having up to 100 seizures a day — asked us if they could try our pharmaceutical-grade, purified cannabinoid on their son. It was his positive response to this medication that precipitated the largest clinical trial program for Dravet and LGS to date. The results from these trials ultimately led to the forming of US-based Greenwich Biosciences and the FDA approval of EPIDIOLEX.

## COLLABORATION IS OUR INSPIRATION

We partner with healthcare professionals, parents and families living with Dravet syndrome and Lennox-Gastaut syndrome (LGS), and patient advocates in the epilepsy community to make sure that we fully understand and address the needs of our patients and their caregivers.

### Indications & Important Safety Information

#### What is EPIDIOLEX?

EPIDIOLEX is a prescription medicine that is used to treat seizures associated with Lennox-Gastaut syndrome or Dravet syndrome in patients 2 years of age and older. It is not known if EPIDIOLEX is safe and effective in children under 2 years of age.

#### What is the Most Important Information I Should Know About EPIDIOLEX?

Do not take if you are allergic to cannabidiol or any of the ingredients in EPIDIOLEX.

EPIDIOLEX may cause liver problems. Your doctor may order blood tests to check your liver before you start taking EPIDIOLEX and during treatment. In some cases, EPIDIOLEX treatment may need to be stopped. Call your doctor right away if you start to have any of these signs and symptoms of liver problems during treatment with EPIDIOLEX: loss of appetite, nausea, vomiting, fever, feeling unwell, unusual tiredness, yellowing of the skin or the whites of the eyes (jaundice), itching, unusual darkening of the urine, right upper stomach area pain or discomfort.

EPIDIOLEX may cause you to feel sleepy, which may get better over time. Other medicines (e.g., clobazam) or alcohol may increase sleepiness. Do not drive, operate heavy machinery, or do other dangerous activities until you know how EPIDIOLEX affects you.

Like other antiepileptic drugs, EPIDIOLEX may cause suicidal thoughts or actions in a very small number of people, about 1 in 500. Call a healthcare provider right away if you have any signs of depression or anxiety, thoughts about suicide or self-harm, feelings of agitation or restlessness, aggression, irritability, or other unusual changes in behavior or mood, especially if they are new, worse, or worry you.

Take EPIDIOLEX exactly as your healthcare provider tells you. Do not stop taking EPIDIOLEX without first talking to your healthcare provider. Stopping a seizure medicine suddenly can cause serious problems.

#### What Else Should I Know When Taking EPIDIOLEX?

The most common side effects of EPIDIOLEX include sleepiness, decreased appetite, diarrhea, increase in liver enzymes, feeling very tired and weak, rash, sleep problems, and infections.

EPIDIOLEX may affect the way other medicines work, and other medicines may affect how EPIDIOLEX works. Do not start or stop other medicines without talking to your healthcare provider. Tell healthcare providers about all the medicines you take, including prescription and over-the-counter medicines, vitamins, herbal supplements, and cannabis-based products.

EPIDIOLEX is a federally controlled substance (CV) because it has a low potential for abuse. Keep EPIDIOLEX in a safe place to prevent theft, misuse, or abuse.

#### What Additional Information Applies to Women?

If you are pregnant or plan to become pregnant, EPIDIOLEX may harm your unborn baby. You and your healthcare provider will have to decide if you should take EPIDIOLEX while you are pregnant.

If you become pregnant while taking EPIDIOLEX, talk to your healthcare provider about registering with the North American Antiepileptic Drug Pregnancy Registry (by calling 1-888-233-2334). The purpose of this registry is to collect information about the safety of antiepileptic medicines during pregnancy.

Because many medicines like EPIDIOLEX are passed into breast milk, talk to your healthcare provider about the best way to feed your baby while taking EPIDIOLEX.

Please refer to the EPIDIOLEX Medication Guide and Instructions for Use for additional important information.

You are encouraged to report side effects of prescription drugs to the FDA. Visit [www.fda.gov/medwatch](http://www.fda.gov/medwatch), or call 1-800-FDA-1088.

You may also contact Greenwich Biosciences at 1-833-424-6724 (1-833-GBIOSCI).
